

## Environment Setup

1. Download XAMPP Control Panel.
2. Start **Apache** and **MySQL** (both must be running).

3. Click on Admin next to MySQL.
4. Click on Add New Database
6. Click on SQL tab then paste ddl.txt and dml.txt.

## **To run your project on XAMPP:**

1. Open the folder where XAMPP is installed.
  - Ex: C:\xampp
2. Open htdocs folder.
  - Ex: C:\xampp\htdocs
3. Put Car\_rental\_system folder inside htdocs folder.
4. Open your browser and type:
  - [http://localhost/Car\\_rental\\_system/frontend/welcome.html](http://localhost/Car_rental_system/frontend/welcome.html)
5. Your project will now run.
