# Environment Setup

1. Download XAMPP Control Panel.

2. Start **Apache** and **MySQL** (both must be running).

3. Click on Admin next to MySQL.

4. Add new Database named carrentalsystem and Tables.

To run your project on XAMPP:

1. Open the folder where XAMPP is installed.

   - Ex: C:\xampp

2. Open htdocs folder.

   - Ex: C:\xampp\htdocs

3. Extract Car_rental_system.zip inside htdocs folder.

4. Open your browser and type:

   - http://localhost/Car_rental_system/frontend/welcome.html

5. Your project will now run.
